ERH

ELECTRIC RADIANT HEATERS

The original non-glowing Electric Radiant Heater with a unique curved black face for focused warmth.

Electric Radiant Heaters

The Heatray ERH delivers overhead, low-intensity radiant heat for indoor and outdoor undercover environments with a non-glowing, discreet appearance and silent, emission-free operation.

ERH panels are slimline, highly efficient, and weather-resistant, providing soft, even warmth ideal for commercial, hospitality, and residential settings.

A variety of installation options are available, including surface or recessed ceiling mounting, wall mounting, and integration with new or existing structures, including Heatray Umbrellas.

Each unit measures 950mm x 150mm and can cover up to 5m², depending on the application.

Energy efficiency

The heater's focal point features a scratch-resistant HTP face, using the latest technology to maximise heat output while minimising energy loss. This innovation sets a new benchmark in the industry, and makes it ideal for indoor and outdoor use.

Application

- Indoor / outdoor wind-protected undercover areas
- Areas where combustion gases are not permissible
- Suits wall, ceiling or Heatray umbrella mounting
- Mounting height 2.3m - 2.7m
- Area coverage 2.2m² - 5.0m²

Key features

- Silver finish, black curved HTP face
- Low-intensity warmth and a low-profile look
- Delivers non-glowing, discreet, close proximity radiant heat
- Slimline and elegant, complementing all architectural surrounds
- Flexible and adjustable mounting options to suit all applications
- 1200W & 1800W models available
- Built to last, using durable aluminised steel construction, delivering high emissivity without the risk of distortion
- Water resistant IPX5 rated for outdoor undercover installation, providing protection against unforeseen exposure to rain and enabling safe cleaning and rinsing
- Rainshield available for outdoor exposed applications
- Optional control modules provide on/off and zone control for banks of heaters
- Minimal above heater clearance enabling installation into areas with low ceilings
- Silent operation, clean and emission free

TECHNICAL SPECIFICATIONS

Application	Close proximity Indoor / outdoor undercover wind-protected areas
Dimensions	950L x 150W x 45Dmm
Weight	6.3kg (excluding mounting bracket)
Materials/ Finishes	Aluminised steel, silver HTP casing, black HTP face
Mounting	Wall / Ceiling / Recessed / Umbrella
Mounting height	2300 - 2700mm
Area coverage	Refer table following
Heat type	Non-glowing radiant heat (longwave infrared)
Power	1200W, 1800W options / 1Ph / 50Hz / 220-240V
Range	1000 - 1500mm forward radius / 120° span
Control	On/Off
Operation	Approx. 20 mins to reach full operating temp.
Connection	3-pin plug or hard-wire
Protection	IPX5

Rainshield	<ul style="list-style-type: none">– 1070 x 230mm– Available for outdoor exposed applications– Aluminised steel, powdercoated
Clearances	<ul style="list-style-type: none">– Forward clearance from flammables - 1500mm– Ceiling clearance - 80mm (refer above)– Side distance to wall - 80mm (refer above)
Control module options	<ul style="list-style-type: none">– 375 x 220mm - 1Ph– Available for zone control of up to 4, 8 or 12 heaters– Safety cut-out, circuit protection, low Amp switching, two-zone control & separate lighting circuit– Optional 2Ph & 3Ph control modules available

MOUNTING OPTIONS

Wall mount bracket

Recessed ceiling unit

Ceiling mount bracket

Ceiling bracket & Rainshield

Single unit tube suspension

Double unit tube suspension

Chain suspension

ERH Umbrella integration

ACCESSORIES

Rainshield

Control module

DESIGN GUIDE

MODEL INFORMATION

Model	Power @ 240V		Suggested mounting height (mm)	Floor coverage guide		
	Watts	Amps		Outdoor undercover unprotected (m²)	Outdoor undercover protected (m²)	Indoor (m²)
ERH 1200	1200	5	2300-2500	NA	2.2-2.5	2.5-3.0
ERH 1800	1800	7.5	2300-2700	NA	2.5-3.5	4.0-5.0

With efficient operation and elegant design, Heatray products deliver superior infrared warmth in all kinds of environments.
